A LETTER FROM OUR ACADEMIC DIRECTOR

Dear all,

With the end of this academic year 23-24, I am grateful to everyone who contributed to making this year's end successful. Despite all the unexpected challenges that we faced, we had a successful year, and our learners had some wonderful and unforgettable moments, learned new ideas, and formed new friendships.

For all learners who worked hard throughout the year, your journey is fruitful as you have harvested what you planted. Dear learners, every achievement starts with a decision. A decision to try and keep trying until you succeed. Remember that failure can always be an opportunity to learn new things. Deep inside every one of you lies great and hidden potential. You have to believe in yourself and never give up. Congratulations to you for all that you have achieved this year. I look forward to hearing about your continued success.

I would like to take this opportunity to thank not only the teachers for their patience, dedication, and the support they offered to our learners but also the parents, whose partnership with the school is vital and will always have a positive effect on their children's education.

I would like to wish you all a wonderful and relaxing summer vacation, and I look forward to welcoming you all back, refreshed, for a new and exciting academic year.

My sincere wishes,

George Srour
Boys' School Academic Director

A WORD FROM THE SENIOR SCHOOL HEAD

In this ever-evolving world, the coming times of education are substantially connected with improvements in modern innovations and computing capacities. As a pioneer in modern technology, Khaled International Schools (KiS) aim to offer the best educational services to our learners.

Knowing that the devices are the future, our dedicated teachers are showing the learners how to use them effectively, providing them with the best chances for worldwide educational exposure and armoring them with the life and social skills they will need to succeed. The use of technologies is implemented in our classrooms and integrated into all activities. Learners are at the center of our classrooms and participate actively in their learning. They inquire, discover, and learn while having fun.

In this prospect, we proudly announce that KiS launched its Robotics program in the 2023-2024 Academic Year. Learners from all grade levels have gained hands-on experience in our state-of-the-art labs, equipped with 3D printers and laptops.

At last, one can't but highlight the crucial role our academic staff plays in forging young minds with strong personalities who know how to balance the use of technology in their day-to-day lives and put it to good use.

We hope you enjoy your summer and are ready to take on another academic year full of new accomplishments and adventures with our learners.
